

Production Estimate Form

BUSINESS NAME:	COUNTY WHERE BUSINESS IS LOCATED:	WSDA CERTIFICATION NUMBER:
----------------	-----------------------------------	----------------------------

Please provide yield information for crops that will be in organic production. This form provides us with yield information to facilitate the verification of your previous year's yields at the time of your annual organic food inspection. **Livestock producers should report the yield of any feed crops grown on farm as well as meat, dairy or egg products that are produced.**

NOTE: If Section A. is not suitable for your farming operation's recordkeeping system, please complete Section B.

Section A. 2006 Production Estimate Information

Instructions: In the chart below, please provide details of your estimated yields of certified organic crops and products for 2006.

Organic Crops/Products	Estimated Acreage in 2006	Estimated Harvest in 2006	Units of Measure	Yield per Acre
Example #1: Red Delicious Apples	24 acres	960	Bins	40 bins per acre
Example #2: Mixed Vegetable CSA Shares	Less than 1 acre	10 whole/5 half	Shares	NA
Example #3: Carrots for direct sale	100 row feet	N/A	Row foot	NA
Example #4: Silage	80 acres	400	Tons	5 tons per acre
Example #5: Milk	40 milk cows	1,000,000	Pounds	25,000 lbs./cow

Section B: If you do not maintain production records in the above format please complete this part.

Submit a written explanation of how you maintain production records. Other types of production records could include: amount of seed planted, by variety; row feet planted, by variety; number of boxes of product harvest. Please describe your method for recording your previous year's production and your estimated production for the current season:
